

# ABORTION IS **NOT** A TREATMENT FOR SUICIDE.

Medical experts have submitted evidence on abortion and suicide to a Government Committee.

**1** All of the medical experts agreed that abortion is not a treatment for suicidality.

"There is no evidence...that termination of pregnancy is an effective treatment for any mental health disorder or difficulty."  
- PROF. JAMES LUCEY, ST. PATRICK'S HOSPITAL

**2** None knew of a case where an abortion was required because a woman was suicidal.

"Have we ever had to perform a termination of pregnancy because of risk of suicide? Not in my experience."  
- DR. SAM COULTER-SMITH, MASTER OF THE ROTUNDA HOSPITAL

**3** The treatment for suicidality in pregnancy is to provide the best medical care and support to women.

"...even the notion of carrying out an emergency termination is completely obsolete in respect of a person who is extremely suicidal."  
- DR. JOHN SHEEHAN,  
CONSULTANT PERINATAL PSYCHIATRIST, ROTUNDA

THE EVIDENCE SHOWS THAT ABORTION IS NOT THE ANSWER.  
THE GOVERNMENT NEEDS TO LISTEN TO THE EXPERTS.
